

# ENVIRONMENTAL & SUSTAINABILITY POLICY

(ISO 14001:2015, Clause 5.2)

## At De Goey Contractors, we are committed to Protecting the Environment and working Sustainably:

We have established this environmental and sustainability policy to be consistent with the purpose and context of our organisation. It provides a framework for the setting and review of environmental and sustainability objectives in addition to our commitment towards the following:

- Exercise our duty of care to protect the environment – air, soil, water, flora, fauna, and cultural heritage sites - from any adverse impact arising from DGC work activities.
- Establishing and maintaining a comprehensive, sustainable Environmental Management System in compliance with industry best practice and regulatory requirements.
- Conform to applicable legislative, regulatory and compliance obligations.
- Actively consulting and communicating with our workforce to provide and communicate on environmental matters, sustainable environmental practices, company successes and opportunities for continuous improvement.
- Reducing our emissions to the environment where possible and to work hard to minimise the pollution throughout all our works.
- Promoting the sustainable use of resources and energy by adopting a 'reduce, reuse, recycle' mantra.
- Ensuring all environmental incidents are thoroughly investigated, actions implemented, and learnings communicated throughout the business.
- Continually improve our environmental management system and to enhance environmental performance.

We have produced environmental objectives which relate to this policy.

This policy is available to all interested parties as well as being made available to the wider community through publication on our Website and Company Noticeboard.
