CAPABILITY STATEMENT

CONCRETE REMEDIATION

CAPABILITY OVERVIEW

CONCRETE
REMEDIATION

TRAINING & CERTIFICATION

Highly Experienced Team

DGC is operated by fully certified staff, trained by NACE and other relevant bodies

- ✓ NACE CP Trained (Cathodic Protection)
- ✓ NACE CIP Trained (Coatings)
- ✓ HPWJ Trained Workers, trade qualified form-workers & concreters

Certifications & Accreditations

- ✓ PAS99 Integrated Management System accredited to:

- ISO9001:2015
Quality management system
- ISO 45001:2018
OH&S management system:
- ISO 14001:2015
Environmental management system

Subcontractors engaged by DGC are also assessed to the same stringent standards.

DGC's in house concrete remediation and protective coatings divisions are strengthened by an experienced fabrication and piping team.

With over 300 staff across the business, DGC delivers remedial concrete works of any scale, along with new concrete pours including structural elements, slabs and footpaths.

DGC has robust safety training, and actively promotes a Zero Harm policy. The HSE team operates a comprehensive health and safety management system to ISO 45001:2018. To foster a culture where every team member takes ownership of safety, DGC recognises proactive thinking through monthly Safety awards at each site, along with a company wide award for the most impactful safety initiative or improvement.

WORKSHOP FACILITIES

Now operating from an expanded purpose built facility in Paget, DGC is fully equipped to support the assessment, repair and protection of concrete structures. Capabilities include blasting and coating equipment, material preparation and the machinery required to mobilise quickly and minimise delays during on site remediation.

	Address	8 Caterpillar Dr, Paget, QLD, 4740
	Site Area:	6,444sqm
	Workshop:	2,336 sqm
	Cranes:	70T Double Hook
		20T Overhead Gantry Crane
	Power Capacity:	415v 1,00AMP

HARD STAND

	Address	29 Logistics Dr, Bakers Creek, QLD, 4740
	Site Area:	2.26 Acres
	Transport:	Approved B Double access to Bruce Hwy

SAFETY FIRST. EVERY SECOND

SERVICES

De Goey Contractors (DGC) provides clients with the highest quality concrete repair, reinforcement, and protection

DGC offers comprehensive concrete remediation services designed to restore and protect concrete structures across various industries.

Expertise includes detailed assessments, scoping and program documentation, followed by high pressure concrete demolition, surface preparation and industrial cleaning. This is backed by rigorous quality control and testing protocols.

CONCRETE ASSESSMENT & REMEDIATION

- ✓ Concrete survey, scoping and remediation program documentation
- ✓ Concrete coring, drilling and investigation works

SURFACE PREPARATION

- ✓ UHP concrete demolition, surface preparation, concrete scabbling and industrial cleaning
- ✓ Abrasive blasting - wet and dry

REINFORCEMENT & STRUCTURAL SERVICES

- ✓ Reinforcement installation, augmentation and fixing
- ✓ Formwork and falsework
- ✓ Rendering, shotcrete, pre-cast concrete and concrete placement

PROTECTIVE SYSTEMS

- ✓ Cathodic protection installation, testing and commissioning – hybrid, impressed, galvanic and water anodes
- ✓ Surface treatment – concrete sealing, waterproofing, crack injection, concrete coating and remediation
- ✓ Industrial Tiling

CONCRETE REMEDIATION

PROJECT DELIVERY & QA

- ✓ Concrete quality control, assurance, testing & documentation
- ✓ On and off site services, Labour hire

We excel in reinforcement installation, augmentation, and cathodic protection, ensuring long term durability. Our team specialises in surface treatments such as sealing, waterproofing, and crack injection, alongside advanced techniques like shotcrete, formwork, and pre-cast concrete placement.

INDUSTRIES

Mining and Resources

Ports and Terminals
